Reviews

I just started out reading this pdf. It is full of wisdom and knowledge You are going to like just how the blogger publish this publication.

(Lily Gorczany)

PROGRAMMING FOR COMPUTATIONS - PYTHON

Springer-Verlag Gmbh Aug 2016, 2016. Buch. Book Condition: Neu. 264x185x22 mm. Neuware - This book presents computer programming as a key method for solving mathematical problems. There are two versions of the book, one for MATLAB and one for Python. The book was inspired by the Springer book TCSE 6: A Primer on Scientific Programming with Python (by Langtangen), but the style is more accessible and concise, in keeping with the needs of engineering students. The book outlines the shortest possible path from no previous experience with programming to a set of skills that allows the students to write simple programs for solving common mathematical problems with numerical methods in engineering and science courses. The emphasis is on generic algorithms, clean design of programs, use of functions, and automatic tests for verification. 292 pp. Englisch.
