

Photosynthesis: Photoreactions to Plant Productivity

Filesize: 4.15 MB

Reviews

It in a single of my favorite publication. It really is rally interesting throgh studying period. Your life period will probably be transform once you total looking at this book.
(Janie Schultz I)

PHOTOSYNTHESIS: PHOTOREACTIONS TO PLANT PRODUCTIVITY

To get **Photosynthesis: Photoreactions to Plant Productivity** eBook, remember to follow the button beneath and save the file or have accessibility to additional information that are highly relevant to PHOTOSYNTHESIS: PHOTOREACTIONS TO PLANT PRODUCTIVITY book.

Book Condition: New. Publisher/Verlag: Springer Netherlands | All biomass is derived from photosynthesis. This provides us with food fuel, as well as fibre. This process involves conversion of solar energy, via photochemical reactions, into chemical energy. In plants and cyanobacteria, carbon dioxide and water are converted into carbohydrates and oxygen. It is the best studied research area of plant biology. We expect that this area will assume much greater importance in the future in view of the depleting resources of the Earth's fuel supply. Furthermore, we believe that the next large increase in plant productivity will come from applications of the newer findings about photosynthetic process, especially through manipulation by genetic engineering. The current book covers an integrated range of subjects within the general field of photosynthesis. It is authored by international scientists from several countries (Australia, Canada, France, India, Israel, Japan, Netherlands, Russia, Spain, UK and USA). It begins with a discussion of the genetic potential and the expression of the chloroplast genome that is responsible for several key proteins involved in the electron transport processes leading to O₂ evolution, proton release and the production of 2 NADPH and ATP, needed for CO₂ fixation. The section on photosystems discusses how photosystem I functions to produce NADPH and how photosystem II oxidizes water and releases protons through an "oxygen clock" and how intermediates between the two photosystems are produced involving a "two electron gate". | Preface. Chloroplast Genome: 1. The Chloroplast Genome: Genetic Potential and its Expression; A.K. Tyagi, N. Kelkar, S. Kapoor, S.C. Maheshwari. Photosystems: 2. Photosystem I Reaction Centre in Oxygenic Photosynthetic Organisms: Current Views and the Future; S. Hoshina, S. Itoh. 3. Oxidation of Water to Molecular Oxygen; Govindjee, W.J. Coleman. 4. Stoichiometry of Proton Uptake by Thylakoids during Electron Transport in Chloroplasts; B.N. Ivanov. Coordination...
