An exhilarating journey of natural renewal through a year with MacArthur fellow Carl Safina. We meet Eskimos whose way of life is melting away, explore a secret global seed vault hidden above the Arctic Circle, investigate dilemmas facing foraging bears and breeding penguins, and sail to formerly devastated reefs that are resurrecting as fish graze the corals algae-free. Each time science tightens a coil in the slack of our understanding, Safina writes, it elaborates its fundamental discovery: connection. He shows how problems of the environment drive very real matters of human justice, well-being, and our prospects for peace. In Safina s hands, nature s continuous renewal points toward our future. His lively stories grant new insights into how our world is changing, and what our response ought to be.
